PERSONAL PROJECTS

PORTFOLIO WEBSITE

- A simple digital portfolio displaying my creative projects and my work and skills.

- Developed with: React.js

PDF—REARRANGE

- A web application that allows users to upload PDFs, rearrange pages, preview changes, and download the final document.

- In this project I use Python PyPDF for backend PDF processing and PDF.js for frontend preview.

- Developed with: Django and MySQL.

wishcard.free.nf

- Developed a greeting card website where users can log in, create custom cards, upload pictures, and share them via unique links.

- Developed with: HTML, CSS, Java Script, PHP and MySQL.

INTERNSHIP

IBM Internship   (01/9/2023 – 30/9/2023)

- Collaborated with a team during my IBM Skill Build Virtual Internship to develop a React.js-based climate awareness website that educates users on sustainable practices.
